Allowable subject matter

Claims 1, 2, 4-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitations, in combination with the remaining elements as disclosed in claims 1, 4, 15, 19:

- a current limiting device, connected in series between the power source and each LED pair in which the m pairs of LEDs in each respective parallel path are connected in series, the n parallel paths share common power connections but are otherwise electrically separated from each other such that electrical current entering each parallel path passes through the m series-connected LED pairs of only that parallel path; and m is a predetermined positive integer; and n is a predetermined positive integer greater than one such as required by claim 1;
- a printed circuit board (PCB) base having front and rear surfaces and laterally
 extending side-edge protrusions; and contact surfaces on edge surfaces of
 the protrusions; and the PCB based forming a mounting substrate for the LED
 pairs such as required by claim 4;
- a plurality of LED pairs are mounted on a single printed circuit board (PCB)
 base; and the plurality of LED pairs include at least three pairs producing light of each of three colors, whereby objects illuminated by the arrangement appear to a viewer to be illuminated by full spectrum white light such as required by claim 15;

Application/Control Number: 10/714,761

Art Unit: 2821

- a printed circuit board (PCB) base having front and rear surfaces and laterally extending side-edge protrusions, the PCB base mounting substrate for the LED pairs; and contact surfaces formed on edge surfaces of the protrusions', the protrusions are positioned so as to mate with at least one internal contact surface of a fitting designed to receive an incandescent, plasma-based fluorescent or halogen bulb such as required by claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Wilson Lee whose telephone number is (571) 272-1824.

Papers related to Technology Center 2800 applications may be submitted to Technology Center 2800 by facsimile transmission. Any transmission not to be considered an official response must be clearly marked "DRAFT". The official fax number is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For
